FOR IMMEDIATE RELEASE

St. Lucie County Encourages Residents to Sign Up for Alert St. Lucie Notifications Regarding COVID-19 Vaccines

ST. LUCIE COUNTY – St. Lucie County residents wishing to receive a COVID-19 vaccine are encouraged to register with Alert St. Lucie (www.stlucieco.gov/alert) to be notified when vaccines are available.

The Florida Department of Health in St. Lucie County has received a limited number of vaccines, which have already been allocated to the priority groups outlined in Gov. DeSantis' Executive Order (#20-315), which include front-line health care workers/first responders, long-term care facility staff and residents, and the 65 and older population.

Public Safety and Health Department officials are working to acquire more vaccines and distribute them through primary care and medical providers, including hospitals and pharmacies, as well as hosting mass vaccine events.

Once more shipments arrive, there will be more clinics and distribution sites. The fastest way to get notified of the clinics is to sign up for our alerts at www.stlucieco.gov/alert.

If you are already signed up for emergency alerts, there's no need to sign up again. Additional information will be posted at www.recoverystlucie.org and www.stlucieco.gov/covid-19 and <http://stlucie.floridahealth.gov>.
